Written Safety Programs

Hazardous Materials Plans | New Employee Orientation Program | Injury & Illness Prevention Plans

Customized Programs

Both State and Federal laws require employers with ten employees or more to have a variety of written safety programs, based upon the needs of the business or industry. These plans can range from the relatively simple Emergency Action Plan to the extremely complex Process Safety Management Program. Regardless of your need or industry, CSTC has the knowledge and experience to create a custom plan tailored to your business' needs.

Each plan must be specific to your business in order to maintain compliance with OSHA and your state's Occupational Health authority.

At a minimum, each qualifying business must have (and keep available for review by employees):

- Hazardous Materials Business Plan
- New Employee Orientation Program
- Injury & Illness Prevention Plan,
- Emergency Action Plan
- Safety Data Sheet for every chemical present at facility

Depending upon your operation, you may also be required to maintain and document several other written programs including:

- Bloodborne Pathogens
- DOT Drug & Alcohol
- California Accidental Release Prevention
- Risk Management
- Respiratory Protection
- Fire Prevention Plan
- Hearing Conservation

CSTC also has the experience and ability to custom create written safety programs or protocols for any piece of equipment you use or condition that may exist at your facility. Past custom programs include: "Landfill Operations Safety for Heterogeneous Wastes", "Integrated Pest Management", and "Good Handling Practices for Packinghouse Operations."

Below is a list of the various written programs currently offered by CSTC. If you have need of a program that you do not see listed, please call and ask for the Written Programs Manager at (661) 377-8300 or email us.

- Bloodborne Pathogen
